DC-3 Airways World Rally 2013 – Flight five briefing.

The fifth World Rally flight begins at Pescara Airport, Italy. This flight is quite long and entirely IFR using VOR navigation, with an ILS approach to the destination airport. Much of this flight is at high altitude so please ensure an adequate quantity of oxygen is on board.

The total distance is approximately four hundred and ninety Nm's, and overall flight time is approximately three hours and fifteen minutes. Weather is initially good but with fog forecast in Geneva area. Current time is 14:00 Local. Some strong ± 20knot winds aloft are possible.

To begin the flight, from the opening screen select Free Flights, and in the sub menu located above the aircraft image select … Load / Title and select WR2013-05. To begin the flight when FSX is already open, click Flights/Load and in the Category window select My Saved Flights. In the Title window select WR2013-05 and click Fly Now.

You will be placed at the threshold of runway 7 in the default Douglas DC-3. You now have to change aircraft to your chosen DC-3 and prepare for flight. The minimum suggested fuel load is 450 US gallons (2700 Lbs.).

Enjoy the flight.

WR2013– 05. Pescara Airport, Italy (LIBP) to Geneva Airport, Switzerland (LSGG).
