

Example from “Western Canada DB Update Document”

Flight #	From	To	NM	Reference Filename
CW-001	CYWG	CYBR	106	Canada_West.pdf
CW-002	CYBR	CJE3	150	Canada_West.pdf
CW-003	CJE3	CYQR	56	Canada_West.pdf
CW-004	CYQR	CYYN	117	Canada_West.pdf
CW-005	CYYN	CYBP	164	Canada_West.pdf
CW-006	CYBP	CYYC	85	Canada_West.pdf
CW-007	CYYC	CYXC	116	Canada_West.pdf
CW-008	CYXC	CYLW	172	Canada_West.pdf
CW-009	CYLW	CYVR	106	Canada_West.pdf
CW-010	CYVR	CYYJ	36	Canada_West.pdf

NOTE: I derived this DB Update Document directly from my original Western Canada Flight Schedule which I had created with a spreadsheet. I saved it as a separate spreadsheet, deleted the unneeded columns of data, and added the Reference Filename.

Working with the Table format in a Word Processor is just as easy. Delete the unneeded columns and add the Reference Filename. Then highlight the data in the Table and copy it. Finish by opening Excel and pasting the data into the spreadsheet.

The DB Update Document MUST NOT be a PDF file!!!

Only a few minutes and the DB Updating Document is complete with almost no typing needed!
