

Installing the Start-up files for P3D v4

The Start-up files for P3D v4 are located in the P3D v4 package within the folder named [WR2022_Flights_P3D](#).

They consist of 2 files for each Start-up flight, ending in .wx and .fxm.

In total therefore, there should be 10 files.

Copy the 10 files and paste them into the folder where the P3D v4 files are stored. This will normally be located as follows:

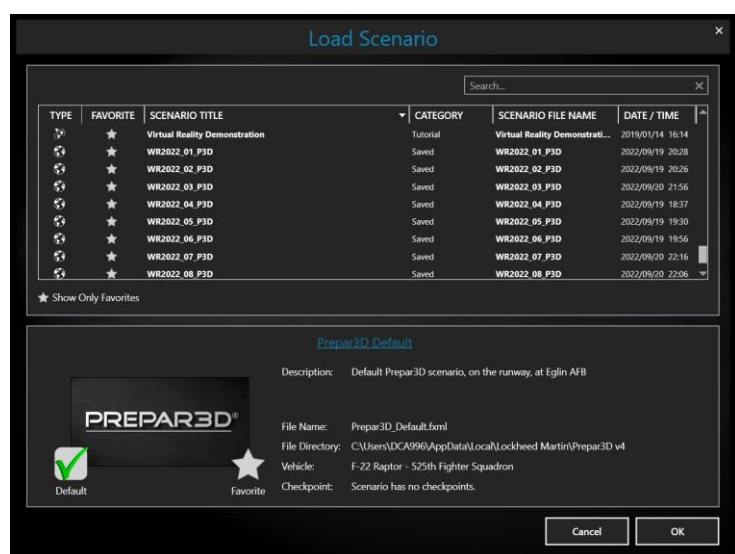

[C:\Users\Username\Documents\Prepar3D v4 Files](#)

To load the Start-up file (scenario) from within P3D v4, access the menu at the top of the screen as follows:

Scenario

Load

The following window will appear:

The scenario for each of the 10 flights are in the format [WR2022_nn_P3D](#) where nn is the flight number.

Highlight the flight you wish to load and click the **OK** button, bottom right.

Users should note that the Start_up flights will place you in a cold and dark cockpit, on the active runway, with 50% fuel and a payload of 4030 lbs. The brakes are on. The simulator is NOT paused.

The weather, date and time for the flight is already pre-set and active. The user is expected to determine their own fuel requirements and decide on the altitudes, headings and airspeed etc. to fulfil the flight as described in the flight description for each flight.

Flight plans for use with the freeware flight planning utility **Little Navmap** , showing the route and waypoints for each flight are supplied in the [WR2022_Flight_Plans_P3d](#) folder.

The user is directed to read the sections regarding how to successfully fly the DC3/C47 which are linked via the WR2022 website.

Above all, we hope that all participants will enjoy the challenges and scenery that each flight has to offer and on completing the WR2022 will have gained a deeper appreciation of the DC3, some of which are still flying today in 2022 having had a maiden flight in December 1935!

Finally, if the rally has left you wanting more in flying the DC3, consider joining our friendly virtual airline, DC3 Airways, where like-minded and friendly individuals will make you welcome.

Details can be found at our website [DC-3 Airways Virtual Airline \(dc3airways.net\)](http://dc3airways.net)

On behalf of the WR2022 steering team we thank you for your interest and hope that you enjoy flying the rally as much as we did in putting it together.
